Nektar Therapeutics Reports First Quarter 2021 Financial Results

SAN FRANCISCO, May 6, 2021 -- Nektar Therapeutics (Nasdaq: NKTR) today reported financial results for the first quarter ended March 31, 2021.

Cash and investments in marketable securities at March 31, 2021 were approximately \$1.1 billion as compared to \$1.2 billion at December 31, 2020.

"We continue to build momentum with our clinical pipeline of novel cytokine therapeutics," said Howard W. Robin, President and CEO of Nektar. "We have a robust development program for bempegaldesleukin focused on pursuing large front-line and adjuvant tumor settings. Our five registrational studies underway in melanoma, renal cell carcinoma, and bladder cancer are progressing as planned. In February, we added a sixth registrational study for bempegaldesleukin plus pembrolizumab in head and neck cancer, which we expect to initiate later this year. In addition, we remain on track to report the first data for our PROPEL study evaluating bempegaldesleukin plus pembrolizumab in patients with metastatic non-small cell lung cancer in the second half of 2021."

"For our second cytokine program in oncology, NKTR-255, our initial efforts include two Phase 1 clinical studies in combination with ADCC antibodies, one in hematological malignancies and one in solid tumors, and we look forward to sharing data from these studies in Q4 of this year," continued Mr. Robin. "Finally, as part of the broad development program for NKTR-358, our T regulatory cell IL-2 agent, our partner Eli Lilly is conducting Phase 2 studies in both lupus and ulcerative colitis and plans to initiate additional Phase 2 studies in two different immune-mediated diseases over the next 9-12 months."

Summary of Financial Results

Revenue in the first quarter of 2021 was \$23.6 million as compared to \$50.6 million in the first quarter of 2020. The decrease was due primarily to the recognition of the \$25.0 million milestone payment from Bristol-Myers Squibb related to the initiation of the registrational trial of bempegaldesleukin plus Opdivo[®] in muscle-invasive bladder cancer in the first quarter of 2020.

Total operating costs and expenses in the first quarter of 2021 were \$133.0 million as compared to \$184.2 million in the first quarter of 2020. Operating costs and expenses decreased primarily as a result of \$45.2 million in impairment charges in the first quarter of 2020 resulting from the discontinuation of the NKTR-181 program and a decrease in R&D expense.

R&D expense in the first quarter of 2021 was \$95.6 million as compared to \$109.0 million for the first quarter of 2020. R&D expense decreased primarily due to a decrease in manufacturing costs for bempegaldesleukin.

G&A expense was \$31.7 million in the first quarter of 2021 and \$26.2 million in the first quarter of 2020. G&A expense increased primarily due to an increase in pre-commercial costs for bempegaldesleukin.

Net loss for the first quarter of 2021 was \$123.0 million or \$0.68 basic and diluted loss per share as compared to a net loss of \$138.7 million or \$0.78 basic and diluted loss per share in the first quarter of 2020.

First Quarter 2021 and Recent Business Highlights:

- In February 2021, Nektar announced a clinical trial collaboration and supply agreement with Merck for a Phase 2/3 study of bempegaldesleukin, Nektar's investigational IL-2 pathway agent, in combination with Merck's KEYTRUDA[®] (pembrolizumab) for first-line treatment of patients with metastatic or unresectable recurrent squamous cell carcinoma of the head and neck (SCCHN) whose tumors express PD-L1. The study is planned to start in the second half of 2021.
- In February 2021, Nektar announced a financing and co-development collaboration with SFJ Pharmaceuticals[®] for the development of bempegaldesleukin plus pembrolizumab in SCCHN. SFJ has agreed to fund up to \$150 million to support the planned Phase 2/3 study and manage clinical trial operations for the study. In return, Nektar agrees to pay SFJ success-based annual milestone payments over a period of seven to eight years which are contingent upon receipt of certain U.S. regulatory approvals for specified indications for bempegaldesleukin, and will begin following completion of the SCCHN study, which is projected to be completed in 2024.
